Student Startup Innovation Programme SPU-SSIP-Navadhārā,
Sardar Patel Startup & Entrepreneurship Council (SPSEC),
Institution's Innovation Council (IIC)
GUJCOST sponsored Anand District Community Science Centre (CSC)

State Level TECHNOVATION 2026
Science-to-Systems: Hackathon
A Competition to bring unique solutions for Viksit Bharat

Celebrating Sardar @150: From Signals to Solidarity

Patron: Prof. Niranjan Patel, Hon'ble Vice Chancellor, Sardar Patel University

who can participate?

Science/Engineering - UG/PG students with specializations in: Electronics/EC/Instrumentation/ Physics/Applied Physics or related branches from any recognized organization in Gujarat

Hackathon Areas (Interdisciplinary & Skill-Based)

1. Smart Environmental Monitoring & Control Systems
2. e - waste Management
3. Precision Agriculture & Smart Irrigation
4. Intelligent Energy Management & Smart Grids
5. Autonomous Mobile Robots for Real-World Tasks
6. Smart Instrumentation & Measurement Systems
7. Healthcare IoT & Biomedical Monitoring
8. Disaster Management & Safety Systems
9. Smart Campus / Smart City Mini Solutions
10. Industrial Automation & Predictive Maintenance
11. Assistive Robotics for Inclusive Living

Tuesday, January 27, 2026

9.00 am to 6.00 pm

PG Department of Electronics, SPU

https://maps.app.goo.gl/qbsHzsT5tBzvvKsK9?g_st=iw

Last Date for Registration: 22-01-2026

Link: https://forms.gle/4swUvRTxXPa3uT2m6

There is NO Registration Fee.

Dr. Vibha Vaishnav
Prof. and Head, DoE, SPU
Hon. Director, CSC Anand, SPU

Prof. Sunil Chaki
Coordinator, SSIP
Director, SPSEC

Dr. Haresh Keheria
Director, SPSEC
Coordinator, IIC,SPU

Dr. Bhailalbhai Patel
Registrar
Sardar Patel University

TECHNOVATION 2026 - Science-to-Systems: Hackathon
27-01-2026

The State Level TECHNOVATION 2026 - Science-to-Systems Hackathon is an interdisciplinary competition aimed at fostering innovation and encouraging students to transform scientific knowledge into practical technological solutions.

Aligned with the vision of **Viksit Bharat**, participants will select a theme from the designated categories and identify a specific real-world problem within that theme.

Teams will then work to develop a functional prototype, demonstrator, or proof-of-concept that highlights engineering design, practical application, and societal relevance.

The primary focus is on problem identification, creative system development, and impactful solution creation.

Rules

- Team Size: A minimum of 2 and a maximum of 4 participants.
- Problem Statement: Each team must define its own problem within one of the official thematic areas.
- Theme Selection: Teams must choose one theme from the provided list.
- Approval: Problem statements must be submitted for approval at the beginning of the hackathon.
- Solution Type: Acceptable outputs include working prototypes, functional block demonstrations, or proof-of-concept systems.
- Original Work: All work must be completed by participants during the event.
- Judging Criteria: Evaluations will be based on the relevance of the problem, innovation, technical depth, feasibility, scalability, impact, and teamwork.
- Final Decision: The judges' decisions will be final and binding.
- Conduct: Participants are expected to adhere to safety protocols, maintain respectful conduct, and follow event guidelines.

Requirements

- **What Participants Must Bring**:
  - Laptops with necessary software/tools
  - Microcontroller boards (e.g., ESP32, Arduino, STM32, Raspberry Pi)
  - Sensors, modules, drivers, and custom electronics
  - Mechanical parts, tools, and accessories as needed
  - Supporting code, libraries, and programming environments

- **Facilities Provided by Organizers**:
  - Working tables and chairs (accommodating up to 4 members)
  - AC (Mains) & DC Variable Power Supply (up to 30V), Digital Multimeter, CRO (Cathode Ray Oscilloscope), Function Generator, Breadboards and connecting wires, Basic electronic components: resistors, capacitors, Linear ICs, Digital ICs (excluding microcontrollers), Basic sensors (available upon advance request) , Wi-Fi access for internet connectivity

Food

Breakfast, lunch, and snacks will be served by the organizers on the event day. Participants may make their own arrangements for any further meals if needed.
